

VERA™ FEEDER

SIMPLE and FLEXIBLE with 100% QUALITY INSPECTION

Revolutionizing the Automated Parts Feeding Industry & Increasing Profit

The D&D VERA™ Feeder revolutionizes the parts feeding industry by eliminating the need for custom tooling. Traditional feeders are big and are made to feed only one part in their lifetime.

The D&D VERA™ is SIMPLE and FLEXIBLE with 100% QUALITY INSPECTION. The VERA™ Feeder can be easily adapted to new parts, therefore extending the life of the machine and increasing your return on investment. The VERA™ Feeder correctly screens parts 100% of the time. 100% = no mistakes, no returns and no down time.

The VERA™ Feeder can be programmed to detect multiple shapes and sizes of parts with no tooling change required.

VERA™ FEEDER

VERA System is an innovative solution to robotics using automated parts feeders.

SPECIFICATIONS:

- Wear resistant steel & aluminum
- Up to 150 PPM
- 100 PSI air
- Size 30.8" L x 33.5" H x 24.5" D
- Table mount (optional stand)
- Input 120V 60Hz single phase

FEATURES:

- 100% part inspection by vision system
- Programmable part selection
- Easy integration
- Quick lead time
- Multiple parts capability
- Indicator light status

OPTIONS:

- Easy multiple part type output
- Bulk hopper
- Network capability
- Primary/secondary configuration
- Auto clean out
